Re: WT Docket No. 07-195 – Notification of Oral Ex Parte Presentation

Dear Ms. Dortch:

On December 20, 2007, John Muleta, CEO of M2Z Networks, Inc., Michael R. Gardner, Esq. and the undersigned met with Commissioner Jonathan Adelstein and his wireless legal advisor, Ms. Renee Crittendon. During the meeting, we discussed the AWS-3 proceeding and the comments that were recently submitted in response to the Commission's outstanding NPRM. We also highlighted, from M2Z's perspective, two key decisions that the Commission should make in this proceeding to unlock the potential of the 2155-2175 MHz spectrum band.

First, we encouraged the establishment of service rules that are technologically neutral. In addition to being consistent with long standing Commission precedent, such rules are particularly important for the 2155-2175 MHz band because they would avoid service rules that promote solely the interests of incumbent AWS licensees. Moreover, such rules would pave the way for this fallow spectrum band to be used for the delivery of much needed broadband services.

Second, we discussed the consumer benefits that would accrue if the Commission were to include in its service rules several public interest obligations. Consistent with M2Z's advocacy in response to the NPRM, we urged the consideration of public interest obligations that would make broadband more affordable and available, provide consumers with additional choice and protection, and ensure that the ultimate licensee would provide service on an accelerated timeframe.
